

Erratum Notice of Figure Legend Correction

Pulmonary *Aspergillus* and *Mucor* Co-Infection

A report of two cases

NOTICE OF ERRATUM FOR: RAVINDRA *ET AL.* PULMONARY ASPERGILLUS AND MUCOR CO-INFECTION: A REPORT OF TWO CASES SULTAN QABOOS UNIV MED J 2021; 21:495–8. [HTTPS://DOI.ORG/10.18295/SQUMJ.8.2021.126](https://doi.org/10.18295/SQUMJ.8.2021.126).

The Editors of Sultan Qaboos University Medical Journal (SQUMJ) have been informed of an error in an article by Ravindra *et al.* in the August 2021 issue of SQUMJ.¹ A reader of SQUMJ contacted the Editorial Office in September 2022 to inform the Editors of an error in the descriptive arrows in the Figure 2 legend: “Histopathology of lung biopsy showing *Aspergillus* and *Mucor* in a 65-year-old male patient. This is a periodic acid-Schiff staining at ×40 magnification showing multiple branching septated hyphae (black arrow) consistent with *Aspergillus* along with broad-based, ribbon-like, non-septate hyphae (red arrow) suggestive of *Mucor*.”

However, this correction could not be made as the article had already been published a year prior.¹ The Editors of SQUMJ wish to notify readers that the correct figure legend is as follows: “Histopathology of lung biopsy showing *Aspergillus* and *Mucor* in a 65-year-old male patient. This is a periodic acid-Schiff staining at ×40 magnification showing multiple branching septated hyphae (red arrow) consistent with *Aspergillus* along with broad-based, ribbon-like, non-septate hyphae (black arrow) suggestive of *Mucor*.”

The corresponding author takes sole responsibility for this notice and would like to apologise to the readers, reviewers and editors of SQUMJ for this correction made after publication.
